WHY?

By everything we do, we believe that we can contribute towards a better, healthier world, through organic food.

HOW?

Our dream is to become the industry standard for trustworthy organic foods. We aim to turn this dream into reality by offering ecological products mainly by processing our own produce harvested from the lands we cultivate and obtained from the animals we grow and nurture ourselves.

WHAT DO WE DO?

We're passionat about organic products and we always use the most secure sourcing. That's because we cultivate and grow nearly everything at our ecologically certified farms from Sălaj Country in the North of Transylvania.

ECOLOGICAL ALSO KNOWN AS BIO OR ORGANIC

Bioforia's organic beef products are crafted so that people get as healthy as possible, the environment stays as clean as we can keep it and nature starts looking even more beautiful.

SHORT FOOD SUPPLY CHAIN

We've built a fully integrated production flow, so that we are able to strictly control the high quality of our products. Beginning with cown out on the meadows, all the way to our own processing and minimal packing, with the least amount of waste, so that we deliver an authentic ecological product to the shelves.

SIMPLIFIED PROCESS

Our processing is simple and environmentally friendly, sustaining biodiversity and excluding flavour enhancers, growth hormones and genetically modified organisms. The taste of Bioforia products is the normal taste of authentic organic beef products.

ROMANIAN ORIGIN

Most of the people working on our cooperative of farms are locals, proud of their heritage and community. Together we make food products out of the land that we work ourselves and from our cattle that we grow and nurture on our own. We never import or collect the meat we use. It comes exclusively from our cows, over whose livelihood we have complete control, from birth and nurturing, to being carefully raised, organically fed, cared for and ultimately ethically sacrificed in the Land of Silvania.

EXCLUSIVELY ORGANIC

The fact that we truly care about ecology is what compels us to have a fully organic process across our whole production chain. We only grow organic grains and all the livestock we raise is raised organically. We process and pack exclusively organic products, without compromise. Even the animal feed and the ingredients that we purchase to mix in our products are organic.
