## WHY?

By everything we do, we believe that we can contribute towards a better, healthier world, through organic food.

## HOW?

Our dream is to become the industry standard for trustworthy organic foods. We aim to turn this dream into reality by offering ecological products mainly by processing our own raw materials harvested from the lands we cultivate and obtained from the animals we grow and nurture ourselves.

## WHAT DO WE DO?

We’re passionat about organic products and we always use the most secure sourcing. That’s because we cultivate and grow nearly everything at our ecologically certified farms from Sălaj Country in the North of Transylvania.

We are currently one of the largest Romanian organic dairy, oils and beef producers.

The new step that we are taking now is processing our own produce in order to deliver organic dairy products, oils and beef straight to the end consumers.

We’re currently looking to expand our mission together with partners that share our vision and values in order to distributed and sell our products to wider target audiences.

Let’s get in touch!
