## **Proposal for Cooperation in the Field of Licensing and Agricultural Machinery Manufacturing Technology**

**Your Excellency,**

UNIA – [www.uniagroup.com](http://www.uniagroup.com) – a market leader in agricultural machinery manufacturing in Poland and one of Europe's leading producers, hereby expresses its intention to establish a strategic partnership in the area of licensing and agricultural machinery manufacturing and operational technologies.

We have been actively present on international markets for many years. In response to a growing number of inquiries, we have now decided to offer full production licenses and complete manufacturing technology, along with comprehensive technical support, to companies seeking to expand their operations in the manufacturing and distribution of agricultural machinery—adapted to specific crops and the requirements of local agricultural profiles.

For over 140 years, UNIA has been developing advanced technologies for agriculture. In recent years, we have made substantial investments in state-of-the-art machinery and production facilities, enabling us to deliver products that meet the highest standards of quality and innovation, as well as to offer cooperation in the field of licensed machinery manufacturing.

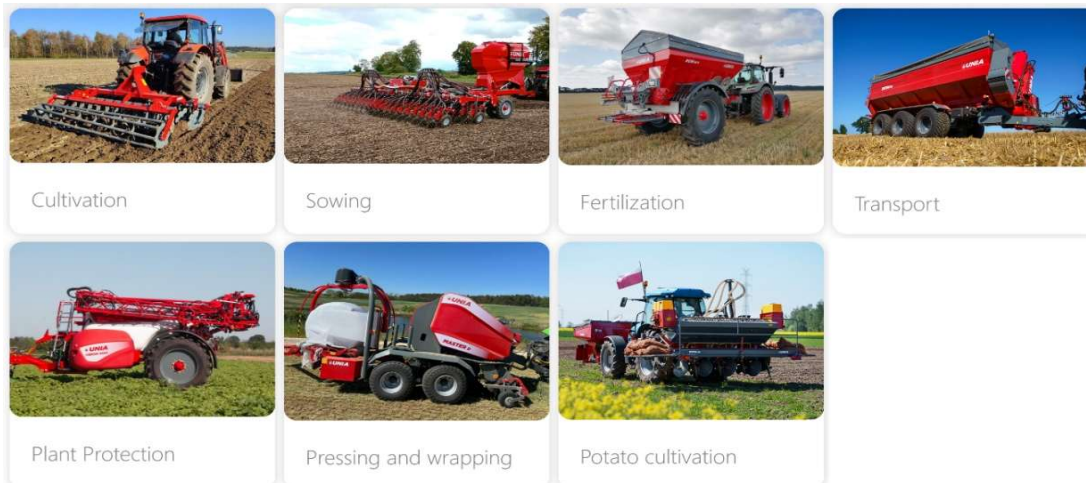

Our portfolio covers a broad range of agricultural machinery, including:

- Soil cultivation equipment,
- Seeding and planting machines,
- Mineral and organic fertilization systems,
- Chemical crop protection equipment,
- Root crop technology (e.g. potato, cassava),
- Grain dryers and storage silos,
- Other solutions tailored to specific needs.

As part of the licensing agreement, we provide full technical documentation, training for management and technical staff, as well as key mechanical components and control systems—ensuring European standards of quality and performance.

### **Market Exclusivity:**

We offer the right of exclusive production, sales, and after-sales service for designated machinery within your territory.

Our objective is to jointly support the mechanization of agriculture in your country by combining our technology with your investment and manufacturing capabilities.

I would like to invite you to a brief online meeting to discuss the financial aspects as well as the implementation schedule for the first pilot assembly project.

As part of cooperation with UNIA, we additionally offer:

- Organization of local field demonstrations and presentations of machinery and cultivation technologies,
- Technical training for teams and end customers,
- Instructional materials and product catalogues,
- Operating manuals and first start-up instructions,
- Establishment of local after-sales service support and implementation of a service program,
- Marketing support.

It is also possible to initiate cooperation by first establishing a commercial partnership as our sales partner and machinery distributor, with the prospect of subsequently commencing local production.

We firmly believe that together we can help ensure abundant harvests.

We would be pleased to enter into discussions with you and remain fully open to cooperation, including the review and discussion of any required references.

**Best regards,**

**Michał Lange**

President of the Board
